

StudentProfessor App

Milestone 1

- Our team consist of 2 members.
 - Sonika Maharjan ID# 920118326
 - Sanil Rijal ID# 918643094

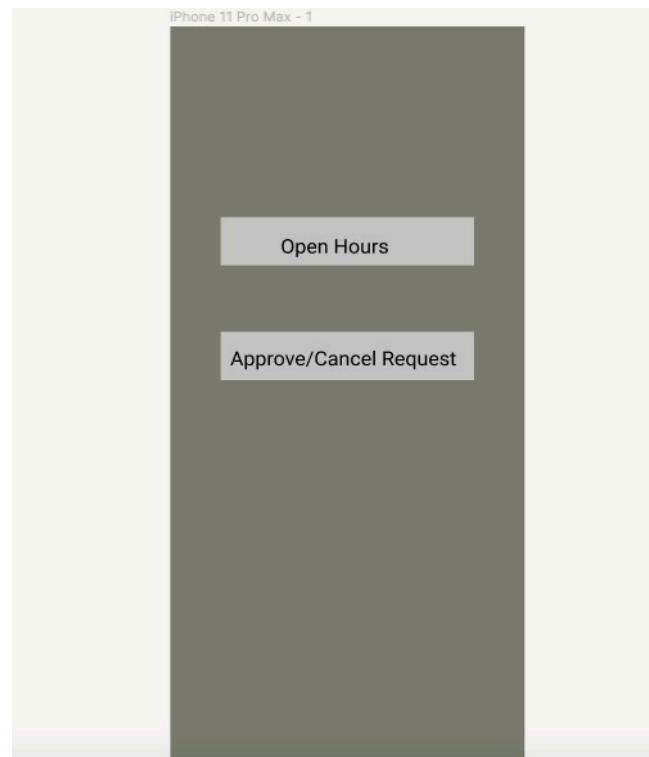

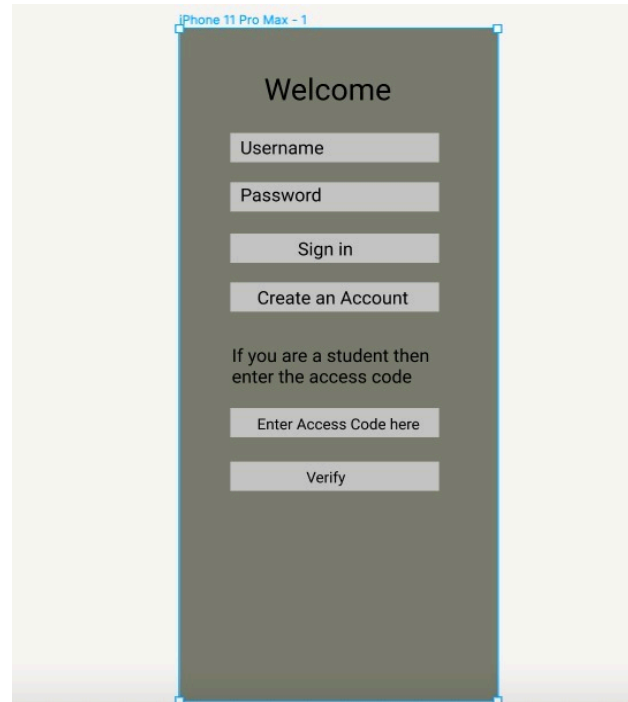

Milestone 2

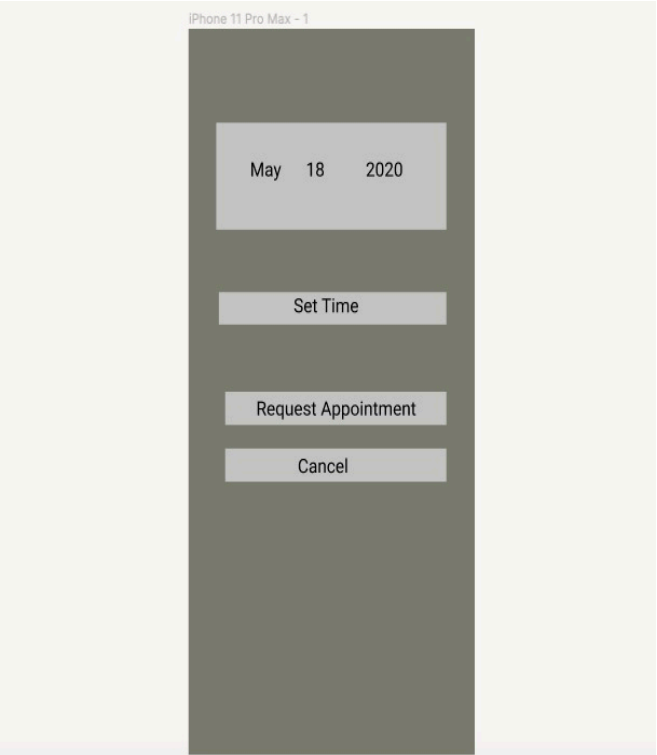

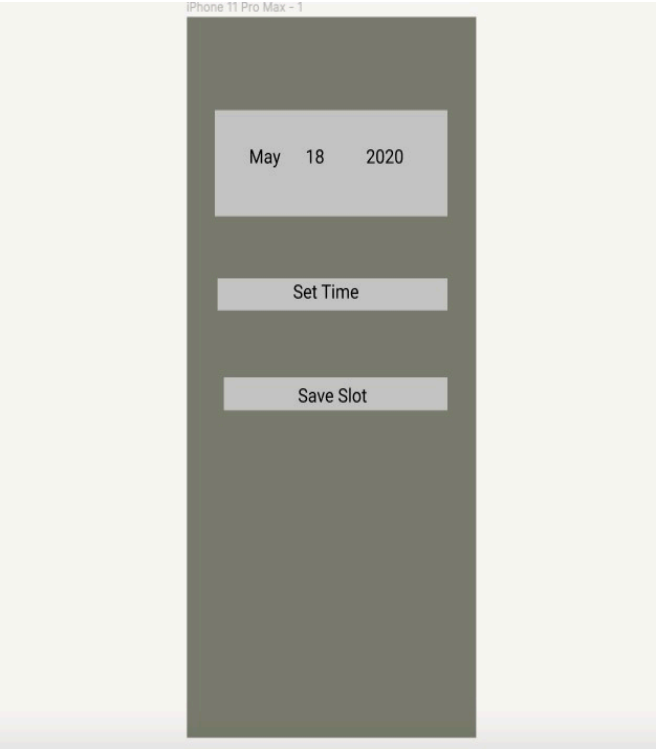

Proposal

- To create a StudentProfessor App which is an office hour app where student can schedule an office hour with their respective Professor
 - Must have Features
 - Student's Interface
 - User shall be able to choose from the available time slot
 - User shall be able to request an appointment
 - Professor Interface
 - Professor shall be able to post their available time slots.
 - Professor shall be able to restrict hours from being scheduled
 - Professor shall be able to create an access code
 - Professor shall be able to approve or disapprove the requested appointment
 - Nice to have Features
 - Professor Interface
 - Button to accept a student's office hour appointment
 - Button to deny a student's office hour appointment
 - Button to provide a reason for cancelling appointment to student
 - Button to send student a reasoning why the appointment got cancelled
 - Student Interface
 - Student can cancel the requested appointment
 - Student can send a message to the Professor

Milestone 3

- Wire Frames

- Time and Workload

We both worked as a team and designed and developed all the features for this app. We contributed equally on each feature. For all the features it took around 72 hours.

Milestone 4
