

## Milestone 1

- We decided to work in a group of 2 members.
- Team members:
  - Sonika Maharjan , ID - 920118326
  - Sanil Rijal, ID – 918643094

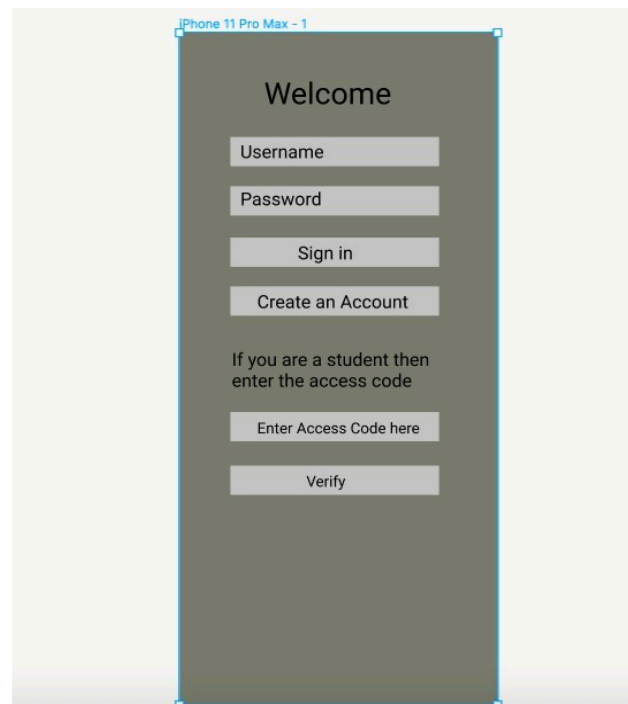

## Milestone 2

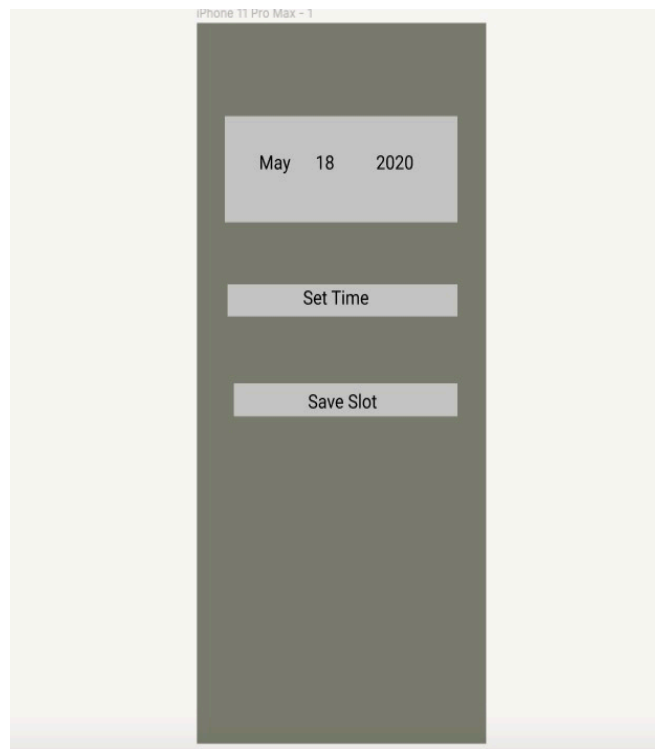

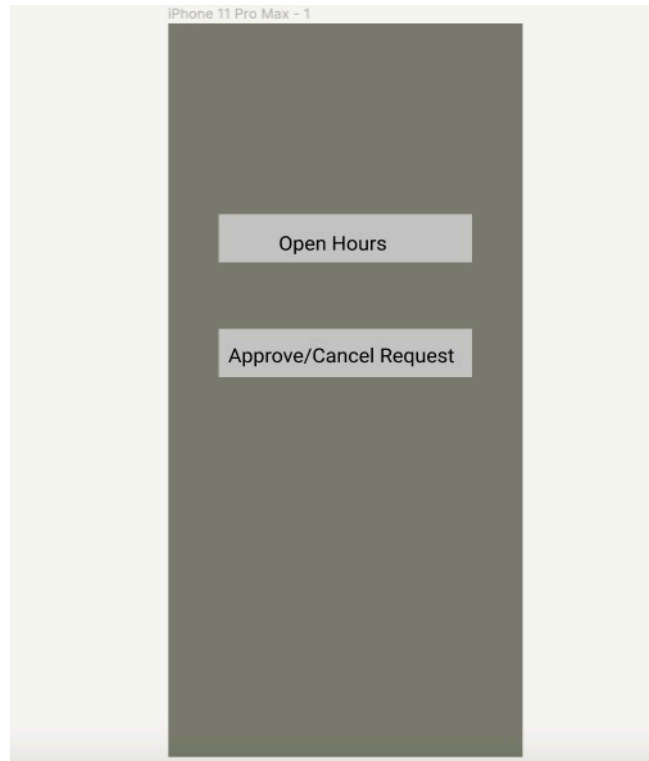

### Proposal

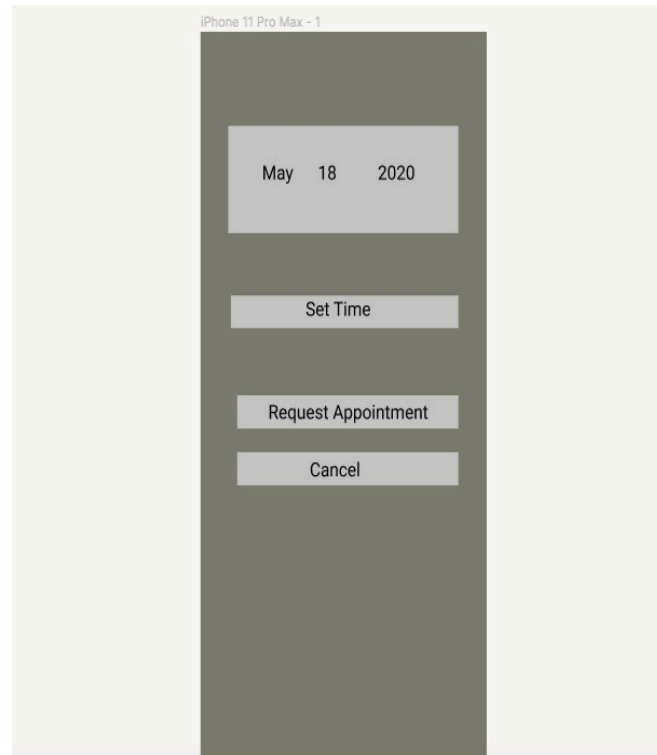

- To create a StudentProfessor App which is an office hour app where student can schedule an office hour with their respective Professor
  - Must have Features
    - Student's Page
      - User shall be able to search for available time slot
      - User shall be able to reserve a time slot
    - Professor Page
      - Professor shall be able to post their available time slots.
      - Professor shall be able to restrict hours from being scheduled
      - Professor shall be able to create an access code
  - Nice to have Features
    - Professor Page
      - Button to accept a student's office hour appointment
      - Button to deny a student's office hour appointment
      - Button to provide a reason for cancelling appointment to student

## Milestone 3

- Wire - Frames

- Time and Workload  
We both worked as a team and worked together for all the features. We both contributed on each feature. For all the features it took around 72 hours for both of us.

## Milestone 4

- Github link
